Founded in 1990, **FLOWTRONIX (FT)** is a leading Manufacturer, Stockiest, Distributor and Supplier of the complete range of high quality Personal Protective Equipment (PPE) and safety solutions. We provide a diverse product portfolio for consolidated safety purchasing to our strategic end user clients, distribute products and services through our largest integrated network of resellers, retail stores and distribution centers.

**Personal Protective Equipment (PPE)**
FT offers a full range of safety solutions for your professional needs. We offer high quality personal protective equipments which guarantee protection against wide range of risks associated with high degree of comfort for our users. We supply our products to all industrial sectors that need protective equipment for their manpower against all kinds of occupational hazards. FT work towards by implementing a total “Head-to-Toe” safety concept to the HSE standards by providing authentic, environment friendly and quality Personal Protective Equipment.

**SAFETY FIRST AT EVERY WORKPLACE**
Serious injury or death in the workplace changes lives forever - for the families, friends, co-workers, employer and communities. That is why it is very important to apply Safety First philosophy in every workplace. Effective health and safety in your workplace can help keeping your employees happy and productive, at the same time reduces the human and business costs of injuries.

**SKYLOTEC** breaking new ground! This catalogue provides lots of news: Not only are structure and layout fresh and dynamic; many newcomers enrich our product range. **SKYLOTEC** products highest safety awareness with top sporting performance, durability with ease, robustness with design and experience with continuous improvement processes.

We offer fall protection range for various industries and applications. We supply innovative and exceptional products and services, which are a clear reflection of the strengths of our brand. **SKYLOTEC** offers an extensive range of Personal Fall Protection Equipment (PPE) and products for permanent fall protection: harnesses, ropes, carabiners, abseiling equipment and rescue equipment, fall arresters, horizontal anchor systems, climbing protection ladders, anchor points, and much more.

Our fall protection range sets new standards in terms of ergonomics, comfort and design. Let yourself be inspired and discover what **SKYLOTEC** has to offer.
Falls are one of the most common causes of serious work related injuries and deaths. Employers must set up the work place to prevent employees from falling off of overhead platforms, elevated work stations or into holes in the floor and walls.

Our fall protection range sets new standards in terms of ergonomics, comfort and design. Let yourself be inspired and discover what SKYLOTEC has to offer. Fall protection are required to be provided at elevations of four feet in general industry workplaces, five feet in shipyards, six feet in the construction industry and eight feet in longshoring operations. In addition, fall protection equipments must be provided when working over dangerous equipment and machinery, regardless of the fall distance.

SKYLOTEC offers a full range of equipment for fall protection - for industrial use and for climbing as a sport. It offers high-performance and innovative “Made in Germany” products, enabling people to work at heights and climb in safety. High-performance products for the highest level of safety. That's what SKYLOTEC stands for.
SKYLOTEC offers a full range of equipment for fall protection - for industrial use and for climbing as a sport. We supply high-performance and innovative "Made in Germany" products, enabling people to work at heights and climb in safety. High-performance products for the highest level of safety.

</table>
Skylotec offers a wide range of fall protection devices in various industrial applications.

Applications:

- Scaffolding
- Metal Construction
- Construction / Roofer / Carpenter
- Mobile Work Platforms
- Lift Construction
- High Rack
- Confined Spaces
- Power Supplies / Transmission / Telecommunications
- Rope Courses
- Arborists
- Rope Access / Rigging
- Facade / Window Cleaning
- Fire Brigade / Rescue / Special Forces
- Wind Energy / Offshore Industry
- Permanent Fall Protection

Safety harnesses are subject to different standards depending on area of application and intended use.

- Work position harness in accordance with EN 358 to keep the user in working position and hold him back in areas where there is a danger of falling. The holding eyelets are normally on the side in the area of the hips.

- Fall-arrest harness in accordance with EN 361 for protection in areas where there is a danger of falling and for catching in the event of falls. Two types of positions, either chest or dorsal, can be used with this type of harness if a person is working on towers, masts and overhangs on buildings.

- Rescue Harness / Loop harnesses and loops for rescuing people. Different designs for various rescue situations.

- Fall-arrest harness for use in climbing protection in combination with EN 353-1. The climbing protection eyelets are normally on the waist belt, centrally in front of the body.

- Sitting Harness in accordance with EN 813 for holding in sitting working position when hanging freely. Sitting harness eyelets are, if possible, in the area of the body’s centre of gravity.
EN

Safety harnesses are subject to different standards depending on area of application and intended use.

**Work position harness in accordance with EN 358**
To keep the user in working position and hold him back in areas where there is a danger of falling. The holding eyelets are normally on the side in the area of the hips.

**Sitting Harness in accordance with EN 813**
For holding in sitting working position when hanging freely. Sitting harness eyelets are, if possible, in the area of the body's centre of gravity.

**Rescue Harness/Loop**
Harnesses and loops for rescuing people. Different designs for various rescue situations.

**Fall-arrest harness for use in climbing protection in combination with EN 353-1**
The climbing protection eyelets are normally on the waist belt, centrally in front of the body.

**Fall-arrest harness in accordance with EN 361**
For protection in areas where there is a danger of falling and for catching in the event of falls.

Two types of positions, either chest or dorsal, can be used with this type of harness if a person is working on towers, masts and overhangs on buildings.
SKYLOTEC stands for maximum safety at heights - in industrial applications & in mountaineering. The highest quality and innovation in all products promise optimal safety combined with comfort and design.

It is a leader in manufacturing Professional Protective Equipment (PPE) and innovative products for fall protection. The comprehensive range includes everything that you need for PPE against falls from heights and for permanent fall protection: harnesses, ropes, carabiners, descenders, anchoring devices, protective clothing, and much more.

SKYLOTEC has the right products for every area of application, each with its own special strengths. We have selected the best products that work together for special areas of application.

CS 2 HARNESS
Article No: 6916 2SK361

Specifications & Features:
- The CS 2 is the classic allrounder among work harnesses
- One size fits all
- The harness is light and easy to put on.
- Simple, good and safe.
- Hand-washing: 40 °C
- Max. service life: 6-8 Years
- Max. No. of persons: 1
- Temperature: from -35 °C to 45 °C

Materials
- Strap: Polyester
- Chest Eyelet: Polyester
- Rear Eyelet: Steel

Components:
Sternal - Chest Eyelets
Buckle
Dorsal - D-Ring

Features
- Hand-washing: 40 °C
- Max. service life: 6-8 Years
- Max. No. of persons: 1
- Temperature: from -35 °C to 45 °C

Components:
Sternal - Chest Eyelets
Buckle
Dorsal - D-Ring

Leg Loops

Article No: 69162SK360

Specifications & Features:
- Light and uncomplicated and yet provides maximum safety
- Adjustable buckles in the shoulder and leg areas
- Can be quickly put on, taken off and adjusted
- Harness belt cannot slip while the harness is being worn
- Hand-washing: 40 °C
- Max. service life: 6-8 Years
- Max. number of persons: 1
- Temperature: from -35 °C to 45 °C

Materials:
- Chest eyelet: Steel
- Rescue eyelet: Steel
- Rear eyelet: Steel
- Strap: Polyester

Components:
- Thigh strap
- Adjusting buckle
- Dorsal - D-Ring

Features
- Uses flame retardant webbing and yarn that makes it a perfect harness for working in high-risk areas.
- Flame retardant, lateral attachment points.
- Quick fasteners that can be solved even after exposure to flame, shoulder and leg straps.
- Hand-washing: 40 °C

High wearing comfort and ease of handling

Another advanced detail feature of the IGNITE SERIES is a new adjuster mechanism. It prevents the harness straps from loosening accidentally.

That is a problem frequently encountered by users of fall protection harnesses. They consider it cumbersome to repeatedly having to re-fasten their straps because they are constantly in motion.

In contrast to that, the models of the IGNITE SERIES harness range do not loosen, even at constant movement.

Wearing comfort and ease of handling are important criteria for users to enjoy wearing their PPE against falls from a height.

IGNITE SERIES sets new benchmarks with regard to ergonomics and design. The personal protection equipment (PPE) against falls from a height is designed that user hardly notices it when wearing and consequently enjoys wearing it. The harnesses from this series are available in different versions suitable for almost all scopes of application, and they represent a genuine relief for all who need to be secured when working at heights.
IGNITE ION
Article No: 69162SK454

Specifications & Features:
- New all-round safety harness for all classical applications in construction and maintenance has above all one major feature due to simplified adjustment options in the chest and leg area as well as three different sizes: exceptional fit!
- The buckle by Fidlock in the chest area snaps magnetically and closes almost automatically
- Two orange roping-up loops made of fabric are approved for joint use and equipped with abrasion indicator for maximum safety.

Materials:
- Strap material: Polyester
- Chest eyelet material: Polyester
- Rear eyelet material: Aluminium
- Material Click buckle: V2A

Components:
- Sternal Chest Eyelets
- Oktalock Buckles
- Leg Padding

Features
- Fidlock Buckle
- Sternal Chest Eyelets EN 361
- Dorsal D-Ring EN 361

Components
- Oktalock Buckles
- Leg Padding

SKYLOTEC’s lanyards are extremely durable and powerful. Experience, innovation, and the latest technology are combined in these lanyards for your safety.

**BFD LR BAND**  
Article No: 69162SK368

Specifications & Features:
- Standards: EN 354, EN 355
- Suspension Element: Webbing
- Carabiner on the belt: FS 51 ST
- Material: Polyamide, Steel
- Length: 1.5 m / 2 m
- Weight: 0.98 kg

**BFD Y BAND**  
Article No: 69162SK369

Specifications & Features:
- Standards: EN 354, EN 355
- Suspension Element: Webbing
- Material: Polyamide, Steel
- Length: 1.5 m
- Weight: 1.56 kg

**SKYSAFE PRO**

Specifications & Features:
- Revolutionary, new, patented energy absorber with the large weight range from 50 - 140kg (110 - 310 lbs.) that always withstands maximum impact of less than 6 kN at a maximum absorber length of 1.75m (5.7 Feet).
- Suitable for edges
- Breaking load, Major Axis: 22 kN
- Suspension Element: Webbing
- Size: 1.8 m
- Carabiner on Anchoring Point Side: FS 90 ST
- Carabiner on Belt Side: KOBRA TRI
- Material: Polyester, Steel

Available in two models:
- L-0568-1,8 (I-rope, 1.32 kg)
- L-0561-1,8 (Y-rope, 2.0 kg)

**SKYSAFE PRO FLEX**  
Art. No.: 69162SK461

**SKYSAFE PRO FLEX Y**  
Art. No.: 69162SK462
Specifications & Features:
- Ultra-compact fall protection device with FS 90 ST carabiner on anchoring
- The Peanut is already equipped with the new One-4-All shock absorber and therefore approved for weight class 50-135kg. 2.5m length for use in scaffolding.
- Standards: EN 354, EN 360:2002
- Max. Service Life: 4-6 Years
- Max. Rated Load: 135 kg
- Suspension Element: Webbing
- Area of Application: Scaffolding
- Size: 2.5m
- Cariber on Anchoring Point: FS 90 ST
- Cariber on Belt side: KOBRA TRI
- Material: Polyester, Polyamide, Steel

Available in:
- Peanut I - HSG-021-2,5-3 (1.8 kg)
- Peanut Y - HSG-022-2,5-3 (2.96 kg)

LIFELINE HORIZONTAL
GURTBAND
Article No: 69162SK367

Specifications & Features:
• Temporary horizontal safety systems are used for assembly work in steel construction, in scaffolding and in construction.
• Lifeline Horizontal is mobile fastening means which has flexible uses and which can be assembled very quickly.
• Two people can therefore work securely over a course of 20 m.
• The anchoring points must be set for a load of 25 kN.
• The ideal combination for the Lifeline Horizontal is the SEP anchoring loop.

ATLAS SK 12
Article No: L-0138-1,5

Specifications & Features:
• Standards: EN 358
• Suspension element: Coated core rope 12mm
• Carabiner on device: KOBRA TRI
• Carabiner on rope: KOBRA TRI
• Size: 1.5m
• Weight: 0.78 kg
HSG HK
Retractable Fall Arrester

Specifications & Features:
- Automatic fall arrest blocks are light and compact & provide maximum in functional safety and durability.
- Spring return is very small, weighing just 1.5 kg.
- Housing is manufactured from break-proof ABS plastic.
- Interior is made of saltwater-proof aluminium.
- Carabiner is equipped with a fall indicator.
- Cable is 5 mm thick & made of steel.
- Maintenance costs are low and professional inspection can take place without opening the device.

- Art. No.: HSG-004-15-T
- Art. No.: L-0151-0,5
- Art. No.: A-001-3
- Art. No.: R-056
Our products are flexible, functional and durable. They are ideally suited to working in confined spaces such as sewers, shafts and containers.

Working in confined spaces, such as ducts, manholes & tanks requires especially durability of the material in addition to flexibility & function.

ROPE ACCESS / RIGGING

Specifications & Features:

• A solid safety harness for rope access that impresses through many improvements in ergonomics and usability with high wearing comfort.

• Special safety harness in V-design, great importance was attached to ergonomic adjustments & optimum freedom of movement.

• Retaining eyelets adapted to the body shape cling perfectly to the hip in folded and unfolded state.

• Anatomically shaped leg and hip padding ensures that no pressure points develop when sitting in the safety harness even during long working days.

• Optimal freedom of movement without pressure points.

Components:

- Sternal - Chest Eyelet
- Dorsal - D-Ring
- Sitting Eyelet - EN 813
- Oktalock Buckles

CS 8 HARNESS
Article No: 69162SK468

Specifications & Features:
- Rope access allows entry to inaccessible workplaces for inspections, installations, repairs or cleaning.
- Elaborate padding is integrated for long stays in fall arrest or sit harness.
- With shoulder and leg padding.
- Attachment points: dorsal, sternal, pole strap and seat.
- Attachment points: Dorsal, sternal, pole and seat attachment point.

Materials:
- Webbing: Polyester
- Sternal attachment point: Polyester
- Pole strap attachment point: Steel
- Dorsal attachment point: Steel
- Seat attachment point: Steel

Components:
- Seat attachment point
- Hip padding
- Dorsal - D-Ring

Features:
- Large Hip D-Rings
- Dorsal - D-Ring EN 361
- Sitting Eylet EN 813
- Positioning D-Rings EN 358
- Leg Padding

Components:
- Seat attachment point
- Hip padding
- Dorsal - D-Ring

**Specifications & Features:**
- Integrated, changeable rope clamp
- V-shaped back construction with comfort padding
- Shaped webbing corners for increased comfort in the neck area
- Adjustable, interchangeable shoulder pads
- Double layer leg padding for increased comfort
- Great adjustment opportunities for long working sessions
- Loops for sit board attachment means optimal work organization
- Large sternal attachment point
- Ergonomically shaped back and hip padding for better support
- Five tool eyelets around the waist
- Ergonomically shaped back

ROPE ACCESS SYSTEM

Rope access system allows entry to inaccessible workplaces for inspections, installations, repairs or cleaning.

• Ascender:
  An ascender that attaches at the chest. Moves with the user and provides good protection in the event of a fall.

• Descender
  Features a unique top-of-the art mechanism that stops completely the descent when the user gets into a panic situation.

• Carabiner
  Oval carabiners are the most suitable ones for use with pulleys, as carriers for belay devices and as center carabiners at the belay station.

Art. No.: BE-016-WE-C

**MILAN 2.0 POWER** is a special version that additionally can be powered electrically. Max. rappelling weight 250 kg.

**RESCUE DEVICE DRIVER SET**
Art. No.: SET-260

**RESCUE SYSTEM**
 Permanent lifeline systems are perfectly suited to securing the safety of people in areas where there is a risk of falling, such as under roofs or on the front of buildings. Users of our system can move freely along the cable, without being attached to intermediate anchors and curved sections.

Permanent fall protection can be used on towers, chimneys, elevated tanks, bridge pillars, masts, antenna masts, machines and operating facilities, high-bay storage and industrial facilities, buildings and facades, shafts, mines and water or sewage tanks.

SKYLOTEC offers secure and reliable complete systems for existing and new projects.

**Specifications & Features:**
- Skyrail system is made of seawater resistant aluminium alloy
- The system is certified as a fall protection device and may also be used for rope access work.
- Designed for floor, wall and ceiling installation.
- Various radius turn modules for horizontal direction changes.
- The ball bearing mounted runner is subject to less wear and provides excellent running properties even in rope access applications.
- The runner may be inserted or removed anywhere in the system.
- Numerous installation requirements are met.
- Great mounting distances
- Approved for 3-person use (max.)

Ceiling installation
Wall installation
Floor installation
Permanent lifeline systems are perfectly suited to securing the safety of people in areas where there is a risk of falling, such as under roofs or on the front of buildings. Users of our system can move freely along the cable, without being attached to intermediate anchors and curved sections.

Permanent fall protection can be used on towers, chimneys, elevated tanks, bridge pillars, masts, antenna masts, machines and operating facilities, high-bay storage and industrial facilities, buildings and façades, shafts, mines and water or sewage tanks.

SKYLOTEC offers secure and reliable complete systems for existing and new projects.
SKYLINE

Specifications & Features:
• The flexible SKYLINE SYSTEM is a stainless steel rope safety system for horizontal applications.

Materials:
• All system components made from stainless steel
• Stainless steel 8 mm in diameter

Underground attachment:
• Attachment to different types of structure such as steel, concrete, masonry, wood, system supports, using suitable fastening methods and technology (involving screws/bolts and dowels)

Positioning:
• Floor, Wall, Ceiling

Number of users:
• 2 in field
Specifications & Features:
• Patented runner with two redundant retention systems & speed-dependent fall arrest function
• Security bolt sits hidden in the housing and is protected there from unwanted access
• SPEED acts like a back-pull runner while climbing
• Runner remains close to the climber and so the fall distance remains short

Specifications & Features:
• A runner of the latest generation that can be attached and detached at any point of the C-profile, but comprises two redundant retention systems as usual
• Construction and double locking mechanism also prevent reversed placement or opening under load.

Specifications & Features:
• SKA 8 is used for safeguarding persons working at positions located at height or depth
• Use at vertical ladders and step iron lines, in connection with catching harnesses
MULTIPLE INDUSTRIAL APPLICATIONS
